

Name: Juvraj Chauhan

Roll No: 202211098

Sex: Male.

Age: 21

Our London business is good, but Vienna and Berlin are quiet. Mr. D. Lloyd has gone to Switzerland, and I hope for good news. He will be there for a week at 1496 Laurot Street and then goes to Turin and Rome. He will join Colonel Parry and arrive at Athens, Greece, on November 27 or December 2. Letters there should be addressed to King James Blvd 3580. We expect Charles E. Fuller on Tuesday. Dr. L. Mc Quaid and Robert Unger, Esq., left on the 'Y.X.' Express tonight.

The problem of state space search requires one to know about the possible actions in a given state, and then code an intelligent agent that would traverse through different states, starting at a given state, to a deterministic goal state. The classical search techniques require for an environment to be deterministic and hence a well defined state space search is formed. The agents can be modified and optimized by using heuristics to motivate the search in a particular direction so as to not explore the unnecessary states.
