

Name : Rajat Kumari Thakur

Roll no : 202211070

Sex : Male

- 1) Over London business is good, but Vienna and Berlin are quiet. Mr. D. Lloyd has gone to Switzerland, and I hope for good news. He will be there for a week at 1496 Louviot Street and then goes to Turin and Rome. He will join Colonel Parry and arrive at Athens, Greece, on November 27 or December 2. Letters there should be addressed to King James Blvd 3580. We expect Charles E. Fuller on Tuesday. Dr. L. Mc. Quaid and Robert Unger, Esq. left on the "Y.X." Express tonight.
- 2) The DES or Data Encryption Standard is the most well known symmetric key block cipher. The design of DES is related to two general concepts product ciphers and Feistel ciphers. Each involves iterating a common sequence or round of operations. The basic idea of a product cipher is to build a complex encryption function by composing several simple operations which offer complementary, but individually insufficient, protection. Basic operations include transpositions, translations, and linear transformations, arithmetic operations and simple substitutions.
